Recipes lovingly
developed by our
expert team

School Meals 2026

We are delighted to present our School meal range to you. Within this document you can view our full range of meals which are available to add to your menus.

Dietary information

The dietary coding information for our meals are highlighted below. This document shows the correct dietary information at the time of publishing and is displayed to help you plan menus. Please check my apetito for up to date information when adding dishes to your menus.

DF - Made without Milk

Meals marked with a dot in the DF column indicate meals where milk & milk derivatives are deliberately not used in a recipe. We take care to avoid any accidental inclusion, but very small amounts could be present, meaning they may not be suitable for someone living with a food allergy.

GF- Gluten Free

A gluten free diet is essential for people with coeliac disease or dermatitis herpetiformis who are intolerant of the protein gluten found in wheat, rye, barley and for some, in oats. Treating these conditions involves following a strict gluten free diet. To help, we have a variety of gluten free main courses and desserts, prepared following strict criteria, to contain no more than 20 parts per million of gluten.

V- Vegetarian

Our range of vegetarian individual and multi portion meals deliver a range of vital nutrients using beans, pulses, cheese, eggs, and Quorn. Our vegetarian meals are free from meat, fish, and their derivatives, including gelatine, but may contain products such as vegetable fats or oils, milk, vegetarian cheese (using vegetarian rennet) or eggs.

V- Vegan (••)

Our vegan meals are made without any animal products, including meat, fish, milk and their derivatives, eggs and animal fats. We do not use honey as an ingredient in any of our vegan dishes.

Rachel Sipaul, apetito Dietitian

"We believe it's essential for children to explore new and exciting flavours from an early age, helping them develop a lifelong healthy eating habits. Our chefs carefully prepare every school meal with kids in mind, using nutritious ingredients, flavours they enjoy, and quality you can trust."

Texture Modified

Our award-winning IDDSI Framework Level 3 (Liquidised) & Level 4 (Purée) dishes are designed for those with swallowing difficulties, providing safe, nutritious & visually appealing meals for children in your care.

World Leaders in Texture Modified Food

The best just got better!

We understand the importance of providing a safe and nutritious meal, particularly for those with swallowing difficulties. We've spent years understanding the needs of individuals with dysphagia and it remains our mission to offer pupils on a texture-modified diet, meals that are not only delicious and safe, but are also full of nutrients to enhance their health and well-being, and ensure they're fuelled to learn.

This March, we're proud to launch our Level 4 Purée Chinese Style Chicken Noodles. Inspired by well known Chinese style flavours, this puréed chicken noodle dish brings welcome variety to Level 4 menus. Savoury and well balanced, it offers a rounded taste that helps broaden choice.

We're also excited to introduce our new Level 4 Purée Lemon Cheesecake. Designed to be enjoyed cold, it offers a light, refreshing citrus flavour in a smooth texture.

What makes our new Texture Modified meals better:

- **Innovative layered designs** to create more authentic recipes.
- **Visually appealing and delicious** - crafted to look as good as it tastes.
- **Greater Variety, Greater Choice** - making mealtimes more enjoyable.
- **Enhanced nutrition** - all of our Level 4 range is 'Energy Dense' helping make the most of every mouthful.
- **Expertly developed** - our award-winning chefs collaborate with in-house dieticians to craft meals that balance great taste with the right nutrition.

"Providing great looking, great tasting, nutritious and safe meals for people with dysphagia is at the heart of apetito's Texture Modified range. Their new, improved puréed range takes these values to the next level: smaller, energy dense portions provide meals that can be enjoyed by people with fatigue and reduced appetites. The addition of sauces is a real boost to appearance, taste and texture, improving quality of life for people with dysphagia."

Tracy Broadley Jackson, Independent Speech & Language Therapist and member of The Health and Care Professions Council.
